

High quality cooker hoods are essential to every modern kitchen, but how do you choose the one that's right for you? Here's what to consider:

Extraction rate: Do you do a lot of deep frying and stir-frying? Then you'll want a hood with more powerful suction, to keep your home free of grease. Look for a hood with an air extraction rate over 1,000 cubic metres an hour.

Noise: Is your kitchen open to your main living area? Then you'll want to ensure your hood is quieter, so you can entertain comfortably. Look for a hood that operates at volumes lower than 50 decibels - quieter than normal conversation.

Slim Line or Chimney: Houses which allow an air vent through the kitchen wall to the outside can usually accommodate Chimney hoods. Compact Slim Line hoods which require no outside venting are ideal for smaller apartments.

Ease of cleaning: To operate on recirculation mode, you'll likely need to clean the filters more frequently and to change the active Carbon filter. Electrolux hood filters are easy to remove and clean, and the high-powered hoods have oil collector receptacles to trap even more oil from the air.

Ultra Clean Hoods

Electrolux-patented Dual Filter Technology, designed for industrial kitchens, is now available for your home. These hoods ensure clog-free airflow, maintaining high performance of the turbo fan and preventing messy oil drops.

- Dual Filter Technology
- Heavy Duty Turbo Fan
- Easy to Clean Seamless Built-in Canopy
- Touch Control (EFC9572X) with Timer

Dual Filter Technology

The powerful Extraction Turbo Fan generates high air flow which is forced through two filter layers, shedding the heavier oil particles onto them. The deposited oil is then channelled to an oil collector, preventing clogging of the filters and maintaining the high air flow. For additional convenience, the two filter layers can be removed and separated for easy cleaning.

The Thoughtful Design Innovator

Do you remember the last time you opened a gift that made you say, "Oh! How did you know? That's exactly what I wanted!" That's the kind of feeling that the designers at Electrolux seek from everyone who chooses or uses one of our products. We devote time, knowledge, and a great deal of thought to anticipating your needs and creating the kind of experiences you really need and want.

This kind of thoughtful care means innovating with insight. Not design for design's sake, but design for the consumer's sake. For us, thoughtful design means making appliances easier to use and tasks more enjoyable to perform. Our aim is to make such convenience available to more people all over the world, in more parts of their everyday lives. So when we say, "We're thinking of you", you'll know we mean just that.

Electrolux. Thinking of you.
